LITHIUM BATTERY® WARRANTY 5 years

MADE IN FRANCE

LIGIER GROUP, the pioneer in the micro-utility market.

"Our line of business consists in inventing and producing niche technological vehicles with the rigour of an industrial structure" François LIGIER, CEO of Ligier Group. The vehicles in the Ligier Professional range illustrate the Ligier Group's product approach: innovation, reliability and performance. These vehicles meet the needs of professionals concerned about the working conditions of their employees and the environmental impact of their activities.

Service that meets the customer's needs

By selecting a distribution and intervention network which already has a solid reputation with professionals, Ligier Group ensures operational vehicle fleet management for its customers. With effective user customer support, the Group now also acts as an intermediary between the user customer and the distributor to guarantee high quality service for each party. Our mobile expert technicians are specially trained to support the Hotline and provide a personalised and complementary service.

Because satisfying our customers' needs is at the heart of our global strategy, Ligier Group offers professionals a tailor-made training service that can be adapted to meet the requirements and constraints of each sector of activity.
