

YOUR SAFETY, OUR PRIORITY !

1 DOOR REINFORCEMENTS

All Microcar door frames are equipped with an oversized longitudinal aluminium beam, reinforcing the passenger compartment.

3 CERTIFIED ROAD HOLDING

Microcar vehicles have been recognised for their handling and dynamic behaviour, exceeding standards thanks to Ligier's historic expertise in suspension and steering.

5 LED DAYTIME RUNNING LIGHTS

For optimal visibility during the day, the daytime running lights automatically come on whenever the headlights are not in use. LED technology ensures exceptional illumination and low energy consumption.

2 FRONT AND REAR DISC BRAKES

Your Microcar is the only light quadricycle equipped with front and rear disc brakes for enhanced efficiency and bite.

4 POWER STEERING

Ligier Group is the only manufacturer of light quadricycles to propose a power steering on its vehicles.

CRASH-TEST ON ALL OUR MODELS, YOUR SAFETY COMES FIRST!

We put all our models through crash tests with dummies. Throughout the development process, engineers also carry out virtual tests on a computer in order to develop all the essential components to keep users safe on the road. These technical simulations allow our teams to ensure intelligent and complete safety, providing maximum survival space in the event of a crash.

M.GO

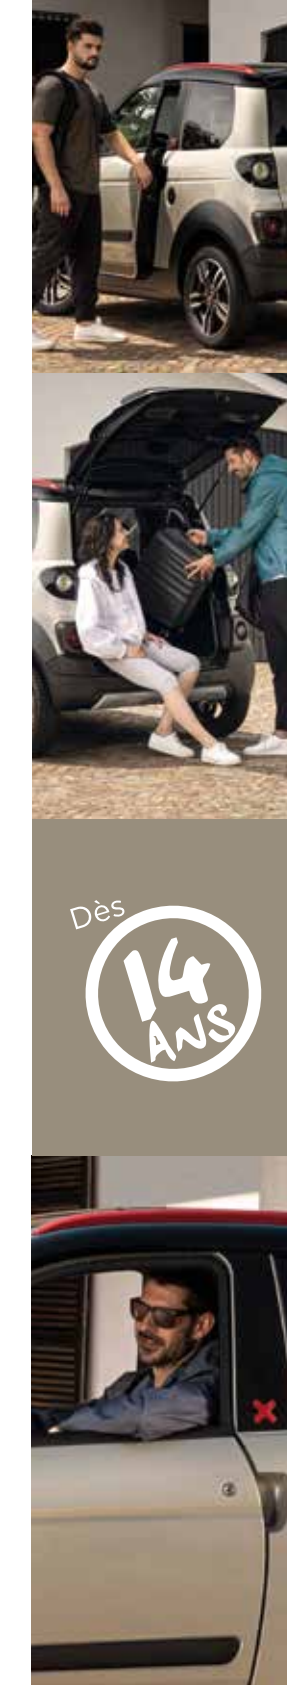

Nº.1 FOR CAB SIZE AND LOAD CAPACITY!

With its spacious driver's seat and uniquely intelligent storage features, M.GO can handle anything you throw at it!

TOP SELLER FOR 3 YEARS RUNNING!

It's easy to see the M.GO is the top seller in the market: our unique FLEX-IT fold-down passenger seat system ensures that the M.GO offers the biggest loading volume and length on the market! Perfect for all your transport needs!
